PROFESSIONAL SUMMARY

Senior Frontend Engineer with 7+ years of experience building and scaling web applications in React and Vue. Strong track record of architecting frontend systems end-to-end, from design systems and monorepo strategies to full-stack product features. Leverages AI-assisted tooling to accelerate delivery while owning technical direction, mentoring engineers, and shipping products that drive business outcomes. Shares technical notes on a [personal blog](#).

TECHNICAL SKILLS

Languages:	JavaScript/TypeScript, Elixir
Frontend:	React.js, Vue.js, Next.js, LiveView (Elixir/Phoenix), Jest, Cypress
Styling/UI:	HTML/CSS, SCSS/Sass, Tailwind CSS, CSS-in-JS, styled-components, Ant Design, Headless UI, Responsive Design, Accessibility (a11y)
State Management:	Redux, Zustand, Jotai, Vuex, Context API
API Integration:	GraphQL, REST APIs
Backend:	Elixir/Phoenix, Node.js, PostgreSQL
Tooling & DevOps:	Git, CI/CD, Webpack, Turbopack, Puppeteer, Docker, Vercel, Netlify

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer @ TruckerPath

10/2025 - Present

Moatable Inc. · Employer of Record: PERSOL Vietnam

NavPro v2: Fleet TMS & Navigation Platform

Team of 12

Shaped early technical direction for NavPro v2, a cloud-based TMS and navigation tool for commercial truck fleets, within a distributed international team.

- Defined coding conventions, project structure, and shared patterns for the v2 codebase, setting the foundation for consistent contributions across the team.
- Ported v1 modules to v2, preserving core logic while enhancing UX and aligning with the new design system, leveraging AI-assisted tooling (Cursor, Claude Code) to accelerate delivery.
- Rebuilt the interactive map layer from scratch on Google Maps API (replacing HERE Maps), enabling complex multi-stop fleet routing.
- Established a review workflow across PRDs, Figma specs, and frontend PRs that improved code quality and delivery speed.

React, TypeScript, Redux Toolkit, TailwindCSS, shadcn/ui, React Hook Form, Zod, Google Maps API

Truckloads Carrier Page Enhancement

Team of 5

Built carrier-facing features for TruckLoads, a free load board connecting owner-operators with 150,000+ daily freight listings.

- Shipped the Docs Pro subscription feature end-to-end, including document scanning, signing, and management with an upgrade flow that opened a new recurring revenue stream.
- Created a WEX factoring signup form that achieved a 20% conversion rate, driving freight invoice financing enrollment.
- Expanded Mixpanel instrumentation across load search and carrier flows, giving the product team data that shaped iteration priorities.

React, SCSS, RxJS, Ant Design, Mixpanel

Back Office: POI Data Management

Team of 6

Expanded the back office for managing the places database (50K+ POIs) that powers truck navigation.

- Implemented POI management features for truck stops, weigh stations, and fuel stations, covering requirements through QA sign-off.
- Unified Mixpanel tracking across modules and stripped PII from event properties to meet data compliance requirements.

Vue, SCSS, single-spa (micro frontend)

Senior Frontend Engineer @ Care

08/2023 – 06/2025 (1 year 9 months)

Employer of Record: Talent Matrix VN | Remote.com

Health Screening Report Generation System

Team of 4

Architected a service that cut PDF health report generation from 1-2 hours (manual) to under 60 seconds, leading a 4-person frontend team.

- Designed the system architecture from scratch and set up coding standards, CI/CD pipelines, and review processes for the team.
- Developed a Next.js + Puppeteer microservice for server-side PDF rendering, turning complex lab data into clinician-ready reports with Recharts visualizations.
- Aligned frontend, backend, and data teams on integration contracts, unblocking downstream feature work and launching health reports as a new platform capability.

Next.js, Turbopack, Puppeteer, Recharts, TypeScript, TailwindCSS, Docker

Enterprise Wellness Platform

Team of 10

Led frontend development for a partner-facing wellness platform with mobile-integrated features.

- Shipped accessible UIs across multiple product modules, coordinating with backend and mobile teams.
- Engineered webview integration for the Flutter app, resolving cross-platform edge cases on Android and iOS.
- Consolidated four frontend repositories into a monorepo, eliminating duplicated components and cutting onboarding time.
- Added event tracking across key user flows, surfacing usage patterns that informed UX redesigns.

React, TypeScript, Zustand, Next.js, SCSS, TailwindCSS, Ant Design

Membership Management Module

Team of 12

Enhanced the core membership system and partner back-office with UX improvements and third-party integrations.

- Led frontend delivery alongside product, design, and backend, ensuring all interfaces matched the design system and passed accessibility reviews.
- Evaluated form-builder frameworks (form.io, BEEKAI) and delivered a validated POC projected to reduce form-related code duplication by 70%.

React, TypeScript, Zustand, Next.js, TailwindCSS, Ant Design

Full-Stack Engineer @ Deliany

10/2020 – 07/2023 (2 years 9 months)

Rebranded: Deliany | Cloud Food System | Norra · norra.ai

Multi-tenant Restaurant Cloud Platform

Team of 8

Grew from Frontend to Full-Stack, leading the architecture of a new POS system and a company-wide UI library.

- Architected and delivered a real-time POS system (Elixir/Phoenix + React), owning decisions from data modeling to frontend state management.
- Created the company-wide React component library on Headless UI, adopted as the standard design system across all product teams.

- Drove a 20% increase in checkout and signup conversion rates by optimizing UI flows based on user behavior data.
 - Ran targeted refactors across multiple codebases, reducing build times and simplifying the contribution path for new engineers.
 - Mentored two junior developers through code reviews and pair programming, growing them into independent contributors within six months.
- Elixir/Phoenix, React, TypeScript, Recoil, Next.js, GraphQL, PostgreSQL, styled-components*

Frontend Engineer (Freelance) @ Multiple Clients

09/2019 – 10/2020 (1 year 1 month)

Built frontend solutions across client projects in shipping logistics and real-time video communication.

- Restructured a Vue.js frontend for a package tracking platform into a modular component library, cutting feature implementation time by 40% and improving page load times by 200% through code-splitting and lazy loading.
- Solely responsible for migrating a video communication app from Vue/Parcel to React/Webpack, delivering a 30% performance boost and integrating WebRTC for reliable, low-latency video.

React, Vue.js, Redux, Vuex, WebRTC, Webpack, Bootstrap

Software Engineer @ Dwarves Foundation

04/2019 – 09/2019 (5 months)

Contributed frontend and full-stack work across client-facing and internal projects.

- Migrated dozens of legacy Vue components to a Gridsome-based architecture for [TelemetryTV](#), an enterprise digital signage platform.
- Developed a full-stack internal lunch-ordering system as part of the DATCOM internship program, covering PostgreSQL schema, Golang REST APIs (Gin/GORM), and a React admin frontend.

Vue.js, Vuex, Gridsome, GraphQL, Golang, PostgreSQL, React, TailwindCSS

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Wizeline Academy:	APAC React Bootcamp Certificate
freeCodeCamp:	Responsive Web Design , JavaScript Algorithms & Data Structures , Front End Development Libraries , Back End Development & APIs
Dwarves Foundation:	Software Engineering Internship Completion
IIG Vietnam:	TOEIC English Proficiency - Score: 870 (12/2014 - 12/2016)

EDUCATION

Advanced Education Program (AEP), Information Systems

Ho Chi Minh City University of Information Technology (UIT) - VNUHCM
